

Applicants respectfully submit an obviousness-type double patenting rejection is not proper under the present circumstances. There are four named inventors in the present application: Kasina, Reno, Fritzberg and Tait. The present application is a continuation of U.S. Application No. 09/632,387 which is a continuation of U.S. Application No. 09/291,823 which is a continuation of U.S. Application No. 08/690,184 ('184 Application). In the '184 Application, three of the named inventors (Kasina, Reno and Fritzberg) assigned their rights to NeoRx Corporation and the fourth named inventor (Tait) assigned his rights to the University of Washington. Copies of the two assignments, which are applicable to the present continuation application, are submitted herewith. Thus, the present application is jointly owned by NeoRx Corporation and the University of Washington.

As noted above, U.S. Patent No. 6,323,313 ('313 Patent) has been cited for an obviousness-type double patenting rejection. The '313 Patent is assigned on its face to a single owner: the University of Washington. Therefore, the present application and the '313 Patent are not commonly owned as required by 37 C.F.R. § 1.130(b).

It is respectfully submitted that an obviousness-type double patenting rejection is not appropriate under the present circumstances. Withdrawal of this rejection is respectfully requested.

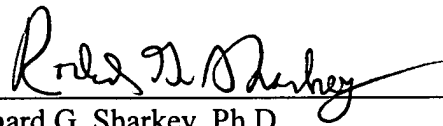

Further, the '313 Patent is not citable as prior art against the present application. The present application was filed July 30, 2001 and the '313 Patent issued later that year on November 27, 2001. Therefore, the '313 Patent is not citable as a printed publication against the present application. On the face of the '313 Patent, the filing date is June 1, 1999 and no priority claim is listed. Thus, the Section 102(e) date for the '313 Patent is June 1, 1999. As described above, the present application is a continuation that claims priority via prior continuations (with no intervening continuations-in-part) to U.S. Application No. 08/690,184 which was filed July 26, 1996. Therefore, the present application has an effective filing date of July 26, 1996, which is nearly three years prior to the Section 102(e) date of the '313 Patent. Accordingly, the '313 Patent is not prior art to the present application under Section 102(e). It is respectfully submitted that the '313 Patent is not citable art against the present application.

Therefore, in light of the remarks set forth above, Applicants believe all the Examiner's rejections have been overcome. Reconsideration and allowance of the pending claims (66-72 and 74-77) are respectfully.

If there is any further matter requiring attention prior to allowance of the subject application, the Examiner is respectfully requested to contact the undersigned attorney (at 206-622-4900) to resolve the matter.

Respectfully submitted,
